## Nice work

Very nice job on Rainlendar 2.0!

The beta versions have been amazing for the last 4-5 months. I've had no major issues at all with it (other than the small things that were already reported and fixed).

On that note, that beta licenses you sent out seem to still work for the Pro version... Is that a problem?

Not a problem. The beta licenses will work with the future releases as well.

hi,i agree,great upgrade! like the renewed skin very much :)

one thing though,it would be nice to have an option for "todo" and "events" list to grow upwards.

in previous version i could achieve that by setting up "GrowUpwards" to "10",now it doesn't work :( what happened to "GrowUpwards"?:(

I added the GrowUpwards to my todo list. Will be implemented in the future versions.

That's great to hear :woohoo:

Can't wait for the new version :P

Site looks great! Good work. Using RL for maybe four yrs now. Always runs at boot. Tried to run RL2 a couple months ago and it wouldn't transfer my preset dates, etc, so went back to previous version. Been waiting for this. Will try immediately. Got here today via newslink at skinnalicious.com, Cliff's site. Thanks, Rainy!

:laugh: :woohoo:
