I was previously using mobile.google.com to get my Google Calendar on my phone, which is synchronizing with Rainlendar (of course!). Now, with the newest OS update, you can add it in as another calendar to your iPhone. There's a short tutorial over at on how to add the gCal -> <http://www.ideaexcursion.com/2009/06/17/howto-sync-google-calendar-on-iphone-os-3-0/>
