
Error in BG localization

Posted by Munchausen - 2009/06/22 01:52

Hello!

There is a mistake in file Shadow4-Languages.r2skin-addon in name of file Events-bg-Bugarian.png, must be renamed to Events-bg-Bulgarian.png, in order to display bulgarian word instead of "Events"

Thanks

The new language pack for the beta versions has this already fixed and it contains new Bulgarian graphics too. The language pack is available from the beta forum.
