## How to not show past events of a day?

Posted by Gideon007 - 2006/11/30 17:44

---

Hi,  
in the event list all events of the current day are shown even when they have already "expired".  
So at 6pm I still see the event from the morning 8am-10am.  
Is there a way to only see current events?

nope, it might be possible to script when the scripting is completely implemented.
