

## skin : Grossy blue v2.1

Posted by phd0 - 2006/12/02 05:05

---

hello,  
i fond a little bug in your digiclock.xml

the good file is :

```
<?xml version="1.0" encoding="UTF-8" ?>
<skin version="2.1">
  <window id="DigiClock" w="200" threshold="48" default="0">
    <image id="DigiClock.background1" element="bitmap.clock.background" origin="TOP-CENTER" x="-75" y="0" />
      <time origin="TOP-CENTER" x="17" y="24" align="CENTER" element="bitmap.numbers.white" format="%Format%"
timezone="%Timezone%"/>
    <image id="DigiClock.background2" element="bitmap.clock.background.worldtime" x="0" y="40"
visible="%Show_worldtime%"/>
      <time x="155" y="95" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="-8"
visible="%Show_worldtime%"/>
      <time x="155" y="113" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="-5"
visible="%Show_worldtime%"/>
      <time x="155" y="132" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="0"
visible="%Show_worldtime%"/>
      <time x="155" y="152" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="+3"
visible="%Show_worldtime%"/>
      <time x="155" y="172" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="+8"
visible="%Show_worldtime%"/>
      <time x="155" y="192" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="+9"
visible="%Show_worldtime%"/>
      <time x="155" y="212" align="CENTER" element="bitmap.numbers.white" format="%H:%M" timezone="+10"
visible="%Show_worldtime%"/>
    </window>
  </skin>
```

i simply add visible="%Show\_worldtime%" for eatch line to hide the world time  
thanks a lot for Pentel for your nice skins !

Philippe (Phd0) france
