
event list: time on top line, with summary beneath

Posted by xzk - 2006/12/02 12:37

I'm trying to figure out how to have the event summary 'word wrap' to the next line, underneath the event time.. so that it won't be cut off.

I could just increase the width of the event list, but I'd rather the calendar and lists all be the same size

it looks like Rainy did it in his screenshots on the frontpage, none of his events go off of their lists, like -

10:00 AM Pay Utility Bill

whereas mine shows up as something like:

10:00 AM Pay Util...

It's not possible to have hard line breaks in the lists but you can enable the word wrapping from here: Options->Advanced->ShowFullEventSummary
