horizontal calendars?
Posted by DWFII - 2012/03/01 08:51

This may be in the wrong place...my apologies if it is.

I just have a quick question about skins--do all recent skins include horizontal calendars that can be made transparent or semi transparent?

Not all skins have all calendars.
Shadow4 is the default skin and it's included with Rainlendar (that is why it has every calendar).

This one is a transparent one: http://flatmo1.deviantart.com/art/Elegant-horizontal-black-skin-182721970
Or this one: http://customize.org/rainlendar/skins/57943
This one by myself is a horizontal-like calendar with transparency: http://jorgeluis-jorgeluis.deviantart.com/art/More-Calendars-1-1-3-189789233

Thank you.

I don't mind any of those. Do they all have the ability to just display one month at a time?

What kind of horizontal calendar are you looking for?

I don't know, I like the one at customize.org...I like all the ones you linked to actually.

but I just want to display one month at a time. When I fist installed Rainlender, I Dl'd Soeima and whole I liked it, it wanted to display more than one month and ran all across the bottom of my screen. Maybe it could have been configured to display just one month but I was too new to RL to know one way or the other.

I also like a pretty minimalist approach--that's why the one at customize.org appeals to me. Less colour kind of appeals to me.

I've got shadow4 set to nearly invisible unless I mouse over it .When I want it, I want it. when I don't I don't want to know it's there.

And something like this: http://brag0n.deviantart.com/art/MoreStyle-Mod-v1-5-1-182062718 ? It has a 50% opacity in the fonts.
