Crashed during backup process on OS X

Posted by observer - 2012/04/08 18:25

Tried to create a backup from the dialog in the Manager panel. I gave the new backup a target filename, and apparently the created backup file has been created correctly (zip contains ini, license, 4 calendar files). However, RL crashed thereafter.

I tried to reproduce the error but it didn't show up again.
Possibly crash might be related to the fact that I had attempted to close the " Manager " window at the wrong time???

Re: Crashed during backup process on OS X

Posted by Rainy - 2012/04/09 01:19

It crashes if you close the Manager while the file dialog is open and you go ahead with the backup operation. It actually should not be possible to close the parent when the file dialog is open but there seems to be a bug in the framework which allows this. It also causes the dialogs to open behind the parent which is really annoying. I'm not sure if I can fix the problem in the framework but I can at least disable the closing of the manager dialog when a file dialog is shown.
