# events do not show when mouse is hovered
Posted by jayslack - 2012/07/28 10:07

---

not sure what the problem is... my 'tooltip show delay (ms)' is already set to 0. also when rainlendar starts up it does not show my daily events even though it is checked off to do so in the 'general' tab.

Just to be sure, when you say "is checked off" you mean "is checked" (and not "unchecked"), right?

Try checking in right click -> options... -> skins -> advanced>>> -> active skins
if the tooltip is active. If not, select it from the left side.

I also see an option to enable/disable tooltips in the advanced tab, but if you say that the delayy time is set to 0 I will assume that this option is enabled.

that's what i mean. the box is checked.

the tooltip is active and is on the right hand side. also the 'show tooltips' is checked.

i've had and older version and it showed up fine even with 'tooltip show delay' set at 1000ms. i'm not sure what is wrong/going on right now.

Maybe it's the same issue. Please look this and check again:
http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&id=16429&catid=3#16429

Notes: the active tooltip must has a subitem.
