
Old version

Posted by Barbara92021 - 2006/12/02 16:42

I absolutely loved the previous version of Rainlender. I started with v. 0.21.2 and updated to v. 0.22.1. I never had any problems with it and suggested it to many friends.

Is this new Rainlender 2 just needing a few bugs to be fixed? It is so annoying to be constantly getting angry with my Rainlender calendar.

I have MS and use the event part to remind me to take my pills. The alarm is used approx. 14 times/day so I sure hope the questions I posted in Support get answered easily.

I really want to be happy with my Rainlender calendar again!!!
