
english months and days remain

Posted by mistriik - 2009/08/05 16:05

Hi,

is it somehow possible to change even the names of months and days in week? I have installed successfully my (czech) localization, but these little things remain untranslated.

Thanks

I am using 2.5 (b81)

If you use the Shadow4 skin you need to install the language addon for it (see the FAQ). If you use the beta versions you can find the correct addon link from the beta thread.
