
Power User Tips

Posted by kevincumbria - 2009/08/11 03:26

I have got to grips with the basics of Rainlendar and I am sure that I am only scratching the surface of what can be achieved. Does anyone else think there is use for a power user section where people can post how they tweak Rainlendar and maximise their potential from it?

There is a wiki being build which would be a good place for all kinds of tips and tricks.

Sounds like a plan to me, I shall look forward to it.
