
Possible to add hyperlinks via scripting?

Posted by Azeiku - 2009/08/12 15:11

I haven't investigated scripting yet but was curious if hyperlinks in todo's could be added via scripting.

Thanks!
Azeiku

It's possible with the newer beta builds (e.g. b81). There is a scripting api which makes it possible to edit the tasks so you can add links to the text among other things.

Ah, I see. Well, I think the wiki text might be enough for what I currently need.

Thank you for your response. :cheer:
