A way to add a categorie color in EL-Bimon skin ?

Posted by fred59 - 2013/03/27 07:59

Hi everybody,

I like Bimon-EL skin by axel s. (the best for me) but i have a request.
I would like use 4 or 5 colors for the events day (for my hollydays, week-end, important, rdv...), but the categories Bimon skin offer 3 colors, Red, blue and orange only.
I would add a color (or more) but don't know how (certainly in add programation line and new pic in xlm code ?).
If someone could explain me if it's possible, it will be very kind !

In advance thank you very much.

All the best
Fred ;)

It's possible, but need to modify the skin's file.

Suggest you to see "Skinning Tutorial", in Rainlendar's Help, to learn how to create/modify a skin.

When you have that knowledge, then you can complete what you want.

Seem complicated for me. :(
Perhaps someone have a clue.
Thank you anyway. ;)

Hi anoob,
Thanks for your answer, it motivated me to work and I did it !
I'm happy.
