
Top tip: Sync Rainlendar, Google & Android Phone

Posted by SnowmanDK - 2009/08/22 23:48

You can make your calendars synchronize between Google, Rainlendar and you Android Phone (such as the HTC Magic and HTC Hero).

Make a mail account on Google.
Go to the calendars section ON your Google account.
Set up the calendar(s) you want.

Add it/them to Rainlendar using your credentials for your Google mail account.
Add it/them to your Android Phone using your credentials for your Google mail account.

That is it.
You can now edit your calendars in any of those places, and then it updates the others.
A VERY easy way to see if you have an appointment (or make a new one) no matter where you are.

You can even SHARE your calendars on Google with other people. Simple, but brilliant.
