Ggoogle calendar event added then deleted

Posted by AndyS01 - 2014/01/10 09:19

When I try to add an event to a google calendar, Rainlendar adds it and changes the color on the correct date, then after 2-3 seconds, it deletes it. This has worked in the past (last one was 01/04/2014).

Here is the log file contents:

Something goes wrong with the authentication. Try upgrading to the latest version of Rainlendar and see if it works then.

Re:Ggoogle calendar event added then deleted

Posted by AndyS01 - 2014/01/10 10:25

I'm running this version:
Version 2.11.1 (b129) 32 bit
Build on Mar 10 2013

I upgraded to:
Version 2.12 (b136) 32 bit
Build on Jan 1 2014

That worked, thank you.

I think this started happening when I mucked with Rainlendar's .ini file, while trying to add a comment to a 'quickadd' template.
