
Multiple date countdown help.

Posted by brcu - 2009/10/10 15:07

I have altered the countdown.xml to

<http://customize.org/thumbnails/medium/68728.jpg>

I would like add multiple dates to countdown to within the same box, is this possible ?

Thanks for any advice.

Yes, it's possible. The "easy" way is to create multiple text elements for the other countdown items and modify the lua script so that it will support multiple timers. Alternatively you can change the separate text elements to a list which can support any number of items. This probably would require quite a lot of changes in the script though.

Thanks for the reply.

I think it may be a little beyond my beginner skills :blush:

Thanks for making Rainlendar :)
