Repeat the alarm

Français
Répéter l'alarme
Bonjour,
À l'heure choisit, la fenêtre d'alarme s'ouvre, et la sonnerie retentie
Mais si l'on ne click sur aucun des boutons, elle s'arrête après le temps programmé
Il serait bon de faire sonner de nouveau l'alarme si l'on n'a pas choisi de bouton
Si par exemple l'on était absent lors de l'apparition de la fenêtre et la sonnerie, lorsque l'on revient l'on ne va pas forcément regarder l'écran du PC
On pourrait utiliser le "défault snooze time" comme délais de répétition
Cordialement

Anglais
Repeat the alarm
Hello
At the time chooses, the alarm window opens, and counter-active ringer
But if you don't click on any of the buttons, it stops after the set time
It would be good to again sound an alarm if it chose not to button
If for example one was absent when the appearance of the window and ringing, when we come back we will not necessarily look at the screen of the PC
We could use the "default snooze time" as repeat times
Kind regards

You can define how long the alarm is played from Options->Advanced->"Loop the alarm sound".

Hello
Sorry for my English, but it comes with an automatic translation
I have perhaps not knew how to explain my desire
After the ring if you do not click on the button "SNOOZE" or the button "DISMIS", nothing happens.
What I want is that, even if you click on any of the buttons, the ringer restarts anyway
Kind regards
Sauveur CONSALVI

I'm sorry but I'm still not sure what you mean. Basically you have two options for the alarm sound. You can either have it play once or you can have it play multiple times. If you e.g. set the "Loop the alarm sound" to 3600 it will play for an hour unless you snooze or dismiss the alarm.
