Removing \"[Default]\" from end of Event messages
Posted by Brooks - 2014/04/24 23:16

I found the thread (approximately 6 weeks ago) about removing "" from the end of Event messages, and went to "Show schedule calendar" under Options-Advanced-Schedule and clicked it to activate it, but it made no difference. What am I missing?

I am running Rainlendar 2.12.2 lite (build 138) on Win 7 Pro (64-bit), using the Shadow4 skin.

The setting you probably are looking for is Options->Advanced->"Show event calendar"

Rainy,

I tried the "Show Event calendar"- both off and on- and it did not change anything. The "Show Event calendar (and the Show schedule calendar) don't appear to have anything to do with removing the word "" at the end of every Event message.

I have included an attachment showing exactly what I am talking about.

Is it even possible to remove ""? http://www.rainlendar.net/cms/images/fbfiles/images/2014_04_25_132341.png

The attached image is showing a "Alarm window",
so, what you need is disabled "Show alarm calendar", from Options-Advanced-Alarm section.

Rainy,

Sorry for not being clearer with my first request--

and anoob,

Your answer hit the nail on the head! Thanks for your help!
