## re: moving calendar to side of desktop

---

Hi,

I use a centered jpeg desktop background image, , that fits my idiosyncratic references. The calendar interferes with the image. Can I move the calendar off to one side? If so\_\_how? Sorry i did a quick search and didn't find anything relevant. It's after midnight here and I am very tired.

I can't do a screenshot, so I attached the image. The calendar obscures the upper part and detracts from my theme.

Please advise as to moving or offsetting the calendar on the desktop. I'll start to think about a skin once I get that done.

I like the simplicity and ease of use of the calendar. Hopefully the conflict won't be fatal.

Thanks,

botnot <http://www.rainlendar.net/cms/images/fbfiles/images/5bgBomberBarrons.jpg>

Just click and hold the left mouse button to move the calendar.
