## chronological events list

Posted by benjam - 2006/12/04 12:43

---

One thing I noticed recently, is that events displayed in the events list for a certain day are not in chronological order. Nor are they shown in chronological order when you mouse over the taskbar icon.

I feel this should be changed and the events should be displayed in chronological order.

Here is an example:

[http://www.rainlendar.net/cms/components/com\\_joomlaboard/uploaded/images/chronological.jpg](http://www.rainlendar.net/cms/components/com_joomlaboard/uploaded/images/chronological.jpg)

The Christmas party occurred after the donation, but is listed first.

Hmm... I thought I already fixed the sorting issues with the events. Are you running the latest build (29)? If yes, what is your timezone?

I have the same problem. My time zone is Central.

I'm not able to reproduce this. If you change your timezone to GMT and restart Rainlendar are the events still in incorrect order?
