## No category from Outlook

Posted by bepyland - 2006/12/04 21:33

---

Hi all,  
i have a problem with the Category.

Rainlendar import correctly the appointment from the Outlook Calendar, but it don't take the category.

I use Outlook 2003 in italian and i have Railander 2 :D

Thanks for your help

Can you attach one of the Outlooks appointments that shows the problem?

- Open the appointment
  - File->Save As
  - Change Save as type to "Outlook Message Format (\*.msg)"
  - Save the file, zip it and attach it.
-

Thanks for the reply. ;)

The problem is on ALL the appointments.

Rainlendar take it correctly, but it doesn't take any category :(

This is one of the appointments.

Thanks [http://www.rainlendar.net/cms/components/com\\_joomlaboard/uploaded/files/2\\_Rata\\_ICI.zip](http://www.rainlendar.net/cms/components/com_joomlaboard/uploaded/files/2_Rata_ICI.zip)

I added the appointment to my Outlook but it didn't have any categories defined. It did have the label set to Important but Rainlendar2 doesn't import those anymore.
