## Eventlist...Click calendar to show only that day.

Posted by scottw - 2009/11/08 20:50

---

Forgive me but I just discovered this amazing piece of software and am stil learning. In a nutshell, what I want is to be able to show a calendar and an eventlist (of sort) and upon clicking a date on the calendar the eventlist will show only that days events. I know the calendar will show a list but I want it to reflect on the eventlist or something similar to the eventlist....a seperate window.

Can this be done???

Thanks,  
Scott

Currently the event list shows the days always starting from today so it's not possible to do this.
