
icons for rainlendar

Posted by solaris - 2009/11/11 03:47

hi there, i'm looking for the way to change or create *small icons* for the *kategory*.

for example: create a new task, then choice an category: aniivesary, birthday, business... then appears a small icon @the left side from the task: look @the image.

how to change/create new icons?

thanks 4 answers :)

If you want to change the icons you need to edit the skin. The *.r2skin file is just a renamed zip file so you can change the extension, decompress it and change the png files which are in the images folder. You can find more instructions how to edit the skins from Rainlendar's help file.

Hi,
I'm looking also for possibility to edit the icons in the calendar.
I use the shadow4 skin and want to edit the icons for this skin.
Where are the icons, what's the name of this file and where can I find it ???
Thanks for any support
tinocio
