---

Hi all,

is ther anyway I can put Rainlendar on a cellphone? I'm about to buy a new cellphone and I would be more than happy if I can have my ranlendar on my cellphone.

So is it compatible with Windows Mobile or Android or anything like that?

AFAIK, not possible, BUT if you sync via Google, smartphones (Android, Windows Mobile, iPhone) generally are able to sync their built in calendar with Google and thus your desktop Rainlendar gets synced, too. Especially now that Google offers Exchange services.

Sweet! Thanks for your answer Gideon007. I'm gonna explore this possibility and hope it will work.

Tomfun
