
Lua?

Posted by BerhanK - 2006/10/30 13:29

I am intrested in knowing how much scripting Rainlendar can allow/handle, anyone know or sen any documentation?!

Regards
Berhan K.

Not much at the moment (just the necessary things to get the legacy skin support working) but I'm going to improve it in the future. I'll also write some docs for the API.

When will the API be avaiable?

It has a low priority at the moment so it might take a while before I have time to implement it.
