French skin localization
Posted by malbec - 2008/06/24 05:48

Hello,

I'm using Rainlendar in French. As you know, the names of the monthes are not translated... I read the FAQ. I downloaded Shadow4.r2skin-addon and put it into Rainlendar, that greeted me with a success message.

But the monthes are still in English!

I restarted Rainlendar.

But the monthes are still in English!!

Is there no French in the bit maps? Did I do something wrong?

Thank you for your help.

Did you turn French on?
Right click > Options > Language > French.

Hello Malbec,

Did you found the solution?
I am in that same position, could you help me, i have read all topic about and I don't find "Shadow4.r2skin-addon" but only "French" and days,month and Events are in english.

You can write in french ..... of course!!!
Merci par avance.
Daniel

If I install the french language,
http://www.rainlendar.net/cms/index.php?option=com_rny_localization&id=704
and the Shadow 4 language pack (Shadow4-Languages.r2skin-addon)
http://www.rainlendar.net/download/Shadow4-Languages.r2skin-addon
it's all in french.

Yes, with the last version 2.4(b64) and the shadow4 skin, the problem is solved and everything is in French now.

J'espère que ceci résoudra ton problème.

Cordialement,

Thank you both, It is not a real succes, but it's now in french !!! It was necessary to rename Shadow4 in shadow4.r2skin to work, as it's explain on an other topic.

I had that same issue and Shadow4 remedies it, thanks to forumers.

Would it not be usefull to point on this trick in the dowload page of this site.
