Where are my icons
Posted by urdrwho - 2006/11/13 12:51

Looks nice, very good but what happened to my calendar icons? There is nothing showing up on the calendar. How can I get my calendar icons to appear? B)

Some of the categories in Shadow4 are different than in the old skin so you might need to change the events to use the new categories. Or modify the skin and add the missing categories to the skin.

I do not know how to edit the new skin. Isn't it in XML format? I know nothing about that type of format.

XML is not that complicated. Knowing html is helpful but not needed. The only tutorial on skinning is a post I made, Skinning Rainlendar2. I don't really explain XML at all but hopefully you can make out what you want. Enjoy.

Thanks for your reply.

Before hearing from you I did find your referenced post. I did change it to a zip file and viewed it. I looked at the event's / calendar / etc. but as of yet, have not found the line where it calls up each category and assigns its corresponding .PNG file. I'll keep looking.

I found it and have things working the way I need them.

Thanks

;)
