# Rainlendar 2.3 build 62
Posted by Rainy - 2008/07/31 14:11

---

Build 62 can be downloaded from here:
Windows: Rainlendar-2.3.b62.zip
Linux TAR: Rainlendar-2.3.b62.tar.bz2
Linux DEB: rainlendar2-pro_2.3.b62-1_i386.deb
Mac OS X (Intel): Rainlendar-2.3.b62.dmg

The 2.4 release is getting nearer so if there are any bugs or other issues which you still want to get fixed in the next version let me know about them.

This is beta version! It has not been tested.

o Mac: Cursor is now changed when you try to drop something over the windows.
o Added --quiet command line argument which removes the message box after succesful import/install.
o Tooltips do not show location if it has been disabled in the todo/event list.
o Added possibility to change any item parameter through the API.
o The due date's time is also read from the Outlook.
o Closing the tooltip dismissed the context menu automatically. Fixed.
o The Windows version doesn't depend on the FaultRep.dll anymore.

I just noticed that the scripting api in this build is broken so some skins and e.g. the addon pack for Shadow4 do not work correctly. The problem will be fixed in the next build.

I'm seeing Rainlendar use 100% cpu for a couple seconds on a periodic basis, every minute or so. The entire system grinds to a halt when it does this. I'm also seeing Rainlendar die, it seems to occur shortly after I dismiss a reminder window.

Are you polling some network calendar or Outlook? What is in the Rainlendar's
url=http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq21]debug log?

I have a couple network calendars.

I've reverted to an older version since, the only things in the recent log are

12:12:21:  ERROR: Invalid recurrence in component B932AD43-CB3B-495B-A2CB-68F0144A0471//f72sbvvkblj0jdkpfsmqmvvap0@group.calendar.google.com
12:12:21:  ERROR: Invalid recurrence in component 1B84730A-2AFB-4298-83F6-CBB949E0EDEC//f72sbvvkblj0jdkpfsmqmvvap0@group.calendar.google.com

Hi,

I've found this problem. I'm using Outlook calendar, I have created a task with date and time of finishing. When I open the task again, the finishing time is 2 hours earlier. If I save it and open again, another 2 hours earlier, etc. This doesn't happen with events, only with tasks.

P.S. Thank you for this great program!

Martin

There was a time zone problem with the task times. Try build 63.
