## can anyone make Dashboard datebook on rainlendar2?

Posted by xings - 2009/12/11 09:41

---

i think this is the best skin, but unfortunately this is not working properly on new rainlendar2. can anyone port this skin into a newer version,make the event listing and todo listing showing right? i could like to do it by myself, but i do not have any knowledge on this. thanks in advance.

here is the link to download the theme.
