## How to increase the appearing text font ?

Posted by kotroj - 2010/01/04 07:15

---

Hello, I've got Rainlendar 2 and I use an old Rainlendar skin LORENZO :black.ini (SKIN'file).  
Could you tell me the way to increase the event font ONLY (without increasing any digits /letters of interface)?  
[http://www.rainlendar.net/cms/images/fbfiles/images/Event\\_drop\\_window.png](http://www.rainlendar.net/cms/images/fbfiles/images/Event_drop_window.png)  
Respect, kotroj.

Try changing the first number (-9) of the ToolTipFont in the black.ini file. It should change the font size for the popup window.
