
changing colors

Posted by deckie49 - 2006/10/30 15:44

rainlendar 2.0 is quite nice. thank yopu for the update.
but is it possible to change color options for days, today, event days, etc?? and, if so, how?
that was an important capability for me in the older version. i hope it is not lost in the new one.

those depend mostly on the skin deckie, so start messing with that :p
