Pop-up window when an Event is now

Posted by steni - 2010/01/13 04:19

_____

Sorry for my English,
in Rainlendar 1 Pop-up a window in the middle of the Monitor (name is Rainlendar) when an Event is now.
In Raindlendar 2 comes only a short Message in the Taskbar.
Can I bring back the Message window in Rainlendar 2?
Thanks

_____

You mean without an alarm?

_____

The old Rainlendar showed all the events in the alarm dialog on startup (even those without an alarm). Unfortunately it cannot be done like that anymore since the alarm window in Rainlendar2 has the snooze and dismiss buttons which only make sense for actual alarms.
