
print Rainlendar

Posted by JeySee - 2010/01/15 08:32

Hi @ all!

I'm new here. I've already worked with an older version of rainlendar and now installed the new one. While downloading I saw, that you can print out the calendar. But I wasn't able to find out how. So my question is, could someone please explain to me, how I manage to print the calendar? Would be very nice. Many thanks in advance!

Choose File->Print in the Manager dialog.
