
date 1 day behind??

Posted by dna1804 - 2006/12/05 21:01

can someone help me??

why is my calendar date is one day behind??

can somebody show me how to change it up at the time format and date format.

currently im in the GMT+8 country.

Rainlendar uses the system time/date. You should double click the clock in on the task bar and make sure the date is correct.
