## Saving Calendar items to an external drive

Posted by moon4707 - 2010/01/28 23:11

---

I have Rainlendar Free. How do I save to an external hard drive my current Rainlendar calendared items. I will have to perform a System Restore to Factory Conditions soon, and if I can save my current calendar dates it will save me a lot of time after the system wipe. Thank you.

You can find the information here: [http://www.rainlendar.net/cms/index.php?option=com\\_easyfaq&Itemid=26#faq1](http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq1)

It depends which OS you have.

Your events are in the .ics file. You just have to copy/paste it on your external hard drive.
