
.vcs files from tvguide.co.uk website?

Posted by crazybee - 2010/02/16 06:02

Hi there folks wondering if you could help me out here.

The tvguide.co.uk website lets you add calendar events directly to calendars but I cant get it to add to rainledar.

I keep getting a error from Rainlendar "Unexpected Parameter "C:.....reminder.vcs"

then a Rainlendar2 message box come up about rainlendar useage and parameters.

is there anyway I can get it to add the event to rainlendar?

I'm using firefox and would like to just click on the event though firefox and it gets added to my calendar

Try downloading the file first e.g. to your desktop and then use the File->Import->iCalendar Format in the Manager dialog to import it.

thanks that worked as well as just dragging the .vcs file over the calendar too :)
