
Skins in Zip files and more than one calender

Posted by sam49 - 2010/03/10 06:29

Hi i have just started using Rainlendar and i have downloaded aome skins with file extention r2skin i have no problem importing them into Rainlendar. But skins with the RAR, Zip file formats i dont know just what to copy into rainlander and where to put it.

Also is there a way of displaying two calendars on the screen IE March and April for example or say June And July

Any help will be nice

Regards Edward

You need to uncompress them and copy the files to the Rainlendar's skins folder as explained in the help.
