## Display flagged emails in ToDo list?

Posted by iboutoma - 2010/03/10 21:45

---

I've had Rainlendar for a long time (bought in 2007), but one really annoying thing keeps me from using it more frequently than I would like. I can't figure out a way to have ToDo list in Rainlendar display all the same items as Outlook (Exchange mailbox) displays.

Rainlendar appears to only pick up the "Task" tasks, and not the email messages that are flagged for a response. Perhaps this is not possible, and only MS can aggregate items like this. But I would love to get an answer.

For instance, in the screenshot below, only the "Registration Confirmation..." task appears in Rainlendar's TODO list. The most common use case for me and my colleagues is to flag an email with an appropriate follow-up - this simplifies how users manage actionable items as they arrive.

Currently Rainlendar reads all the items from the Outlook's Tasks message store which doesn't include the flagged mails. But I can look into this and see if it's possible to optionally read the emails as well.

I couldn't find a PM option so i'm posting to the thread.

Rainy, do you have an ETA on this functionality?

Thanks,

Ilia

It all depends on how much free time I have for this project and how much other issues need to be solved so unfortunately I cannot give any estimates.

Bought Rainlendar today and is not completely happy. Quite a bit of configuration before I began to feel at home. Then this. I thought it was a bug until I realised that most of my outlook todo tasks are "follow up this mail" and therefore not included.

---

Are there any workarounds? Kan I get outlook to create "proper" tasks for these followups?
