
reoccurring annual holidays

Posted by Windy Liz - 2010/03/15 10:05

Am new to Rainlendar and a computer novice. Tried to put in Memorial Day as a reoccurring holiday for the last Monday in May - can only get program to accept as a monthly reoccurring event not yearly. Is there a way to do this correctly?

Thanks

Just set the "Repeat every" to 12 to make the monthly recurring event annual.
