
Khmer Language!

Posted by sovichet - 2010/03/28 19:43

Hello :) ! Rainlendar Can you tell me how to upload Khmer language in to your list?, I tried to upload it again and again but it failed. It showed me "Upload failed: Unable to find a correct language code (Khmer)". Please tell me...

Thanks,...,Ú :dry:

Is that the same as Cambodian (that can at least be found from the framework)? I added it to the list of allowed languages. Can you try to upload it now? If it still fails just send it to the support address and I'll add it to the language page.
