
Times set in PM are changing to AM by themselves

Posted by joe771 - 2006/12/07 16:01

This is a strange bug i'm getting with build 29.

If I manually type the time in when creating an event (or if I select 9.00pm but change it myself to 9.15pm) the time changes by itself from the afternoon to the morning. Because of this if I try to make an event starting at 9.00am until 2.15pm the end time is not displayed (because it's changed to 2.15am which would be before the start time).

Anyone else having this problem?

EDIT: I've just switched back to build 27 (I can't use 2.0.1 because of the cleartype issue) and the bug is not there.
