## Adding event -- 10 sec for popup screen to show

Posted by des2000 - 2006/12/08 22:07

---

:S I have the beta build 29 version and noted that it takes a LONG time for the event pop-up screen to show after clicking on a date.

This was instant in previous builds.

Any thoughts?

By "event pop-up screen" do you mean the dialog or the context menu?  
Does this happen when creating a new event or when editing an existing event?
