## Suggestion for Events Reoccurrences

Posted by zarnywoop - 2006/12/09 13:30

---

I would like some more choices for reoccurring events...

Example, I get paid on the 15th and 30th of the month but only if the 15th or 30th falls on a weekday. If it falls on a weekend then I get paid on the friday before that weekend occurs...

This function seems to be quite specific.

I think this option is better to be handled by script rather as an implanted function.

I'm not sure iCalendar standard supports that kind of events.
