
Where are copied skins files ?

Posted by etabeta - 2010/06/20 17:02

Hello,

I use Railendar on usb and I installed some skins but I don't understand where the skins files are copied because in the folder /Railendar2/skins I don't find the skins I installed.

Thanks

You can find them from the Rainlendar's data folder. You can move them to the skins folder in the USB memory if you prefer it that way.
