
Date in the event list

Posted by heinz777 - 2010/07/20 18:01

Hi,

maybe it would be possible, that the event calender has also the date notation e.g.

Tomorrow, 12.12.2010

Friday, 13.12.2010

I think it would be more comfortable.

Thanks

=====

Just type Format codes on advance option's "events list header format".

For e.g. "%HS %x" show "Tomorrow, 13/12/2010"

You can find format table in option --> Help

Key Format as keyword in Index to find it.

Have Fun!
