## \ "Go To" option

Posted by Andre Linoge - 2010/08/02 19:09

---

Goodevening

On regular base i need to see appointmets of the previeous years.  
Now, it appears an tidious job to go manually back by the menu, therefore i like to request an option, for example something like the "Quick Add" methode, to be added in future versions.

You can use the cursor keys to change the months and years in the calendar. That's probably faster way to go to a specific month than to use any dialog for it.
