
\ "New Todo\" missing in calendar context menu

Posted by Jorge_Luis - 2010/08/11 08:40

When you right-click in a free day on the calendar, the context menu shows two options: "New event" and "New todo", amongst other options. But if you right-click in a event/todo on the calendar, it shows "edit", "new event" and "delete" and not "new todo".

I have two task to do in the same day, after enter the first i need to choose another day and then change the date to join them.

If you keep shift key down when you open the menu you get the full menu instead.
