
Rename Calendar function

Posted by evanade - 2010/08/14 01:38

Could it add the rename calendars function?

When I want to rename the calendars I need to duplicate it then delete the original calendar. Also need to retype the password.

Yes, that probably could be added.

It hasn't been implemented yet but it's still on my backlog (can't say when it'll be done).
