
Rainlendar download for Windows 7 64bit computer

Posted by vika6 - 2010/08/14 21:12

There is in FAQ (http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq4) such question :
Can I get Rainlendar2 for other processor architectures (PPC, ia64, ...)?

No. I can support only the x86 version..

But in upgrade instructions for WINDOWS

(http://www.rainlendar.net/cms/index.php?option=com_rny_download&Itemid=32) I found such statement:

...."Important: If you are upgrading from 32bit version to a 64bit it is adviced to uninstall the old 32bit version before installing the 64bit version."

Please explain to me - can I use Rainlendar on Windows 7 64bit computer ??

From where can I download the version of Rainlander suitable for me?

Thanks in advance

Maybe the FAQ is right, but not right now (i think is some years old)

I don't know how suitable is, but you can find the last 64bit stable version in

http://www.rainlendar.net/cms/index.php?option=com_rny_download&all=1 and the last beta version in

Thanks to both of you !!

I didn't noticed this inscription: SHOW ALL DOWNLOADS even I was searching for quite a long time!

Thx once more.
